Further Comments from the Surveys

- As a whole I am satisfied but I got with the impression that some of the lecturers want to sell their product which I did not like
- The case study presentations were actual and interesting
- Both the problems in the IT security and the solutions are defined but I did not understand what the difference between all the solutions is. All of them can be applied
- I would like to see more specific technical details
- The conference has been held just in time and it has great importance for the IT security in Bulgaria
- Useful conference, actual problems, wide range points of view
- I left with excellant impression – organization, interpretation, catering
- The presentation „Security Issues with Web 2.0 Applications“ is very useful and attractive
- Excellent presentation of Symantec
- Excellent impression; the presentations of Uwe B.Kissmann, Istvan Botos, and Slavcho Manolov
- The presentation of Slavcho Manolov was topical and interesting because at the moment the process of approving therules in the field of information and net security in the administration of the country is in process
- Very useful conference with subjects and speakers well selected
- Highly useful forum on high prossesional level, approving the tradition on information security
- In the presentations it could stress better on the actual IT security problems
- Very inetersting presentations. It was pleasure for me to participate
- The whole imperssion from the conference is very good, as always
- Very necessary and interesting
- This is the only event that invites a lot of international speakers
- The subject is inetersting, the spakers are well selected, the organization is on a very high level
- All presentations were good but most were too general
- The presentation of Mr. Shopov was very intersting and intriguing
- Useful event which is important for IT managers. Excellent organization
- This is a forum that I attend every year
